

SPECIAL NOTE: If you notice a few “??” in funny places in your document (e.g., the footer may say “**Page 1 of ??**”), then run L^AT_EX again. That information was not available in the first pass, but it will be filled in properly in the second pass.

Chapter 2 Questions

2.1. Here is my answer to question 2.1 of the text of the book. This question has sub-parts, and so I use another list to answer them.

- a) Answer to first sub-part.
- b) Answer to second sub-part.

2.7. Here is my answer to question 2.7. It also has sub-parts, but for some reason they’re given with roman numerals, and so I’ll use lowercase roman numerals here too.

- i) Answer to first sub-part.
- ii) Answer to second sub-part.

Chapter 3 Questions

3.2. Question 3.2 asks me to list things, and so I give an unnumbered/unlettered list.

- First item in the list.
- Second item in the list.
- Third item in the list.

I also say something after the list.

3.15. Strangely, question 3.15 requires me to list a mathematical equation.

$$\frac{\sin(2\pi T)}{2\pi} = \int_0^T \cos(2\pi t) dt \tag{1}$$

However, you probably don’t need Equation (1) in ECE 481.
